

## **Computer Networks II**

Course 18/19 :: Test 1

#### Escuela Superior de Informática

This exam has 12 questions with a value of 20 points. Three wrong answers substract a point. Only an answer is correct if otherwise not stated. Calculator use is forbidden. The maximum duration of this exam is 60 minutes.

Regarding the ANSWER SHEET:

- Fill in your personal data in the form above.
- Enter Computer Networks II in the field EVALUATION.
- Indicate your ID in the side box (also marking the corresponding cells).
- Check the box «1» in the TYPE OF EXAMINATION box.

Check your answers only when you are completely sure. The scanner does not support corrections or deletions of any kind. It will automatically cancel them. You must only deliver the answer sheet.

# **Computer Networks II**

Course 18/19 :: Test 1

### Escuela Superior de Informática

- E. [5p] Consider the next network parameters:
  - MSS=400 bytes.
  - Slow Start threshold (ssthresh) is 5 times maximum segment size (MSS).
  - 3 duplicate ACKs are received after sending segment 5.
  - A timeout is received after sending the segment 14.
  - rwnd>cwnd

Assuming that TCP congestion control is used and that the sender sends 26 segments, answer the following questions:					
11	p) Total number of rounds, Slow Start (SS) rounds and Congestion Avoidance (CA) rounds:				
	<b>a</b> ) Total=12, SS = 6, CA = 6	$\Box$ <b>c</b> ) Total=10, SS = 5, CA = 5			
	$\Box$ <b>b</b> ) Total=14, SS = 8, CA = 6	$\Box$ <b>d</b> ) Total=11, SS = 6, CA = 5			
12	(2p) What is the value of ssthresh, cwnd and swnd after	receiving the 3 duplicate ACKs?:			
	a) ssthresh=3MSS, cwnd= 2MSS, swnd=4MSS	$\Box$ c) ssthresh=2MSS, cwnd=4MSS, swnd=3MSS			
	<b>b</b> ) ssthresh=2MSS, cwnd=2MSS, swnd=2MSS	☐ <b>d</b> ) ssthresh=4MSS, cwnd= 2MSS, swnd=2MSS			
13	(2p) Which segments are sent in round 6? Enter the order number of the segments?:				
	□ <b>a</b> ) 14, 15	$\Box$ <b>c</b> ) 12, 13, 14			
	□ <b>b</b> ) 13, 14, 15, 16	□ <b>d</b> ) 17, 18

## **Computer Networks II**

Course 18/19 :: Test 1

#### Escuela Superior de Informática

E. [5p] According to the following figure, that shows a TCP flow, answer the related questions:

14	What are the retransmission timer length for A and B? (expressed in ticks):		
	☐ <b>a</b> ) A=3, B=3	□ c) A=5, B=4	
	□ <b>b</b> ) A=4, B=4	☐ <b>d</b> ) A=4 B=5	
15	What was the A receiving window?		
	a) Less than 200 bytes	□ <b>c</b> ) 600 bytes	
	□ <b>b</b> ) 400 bytes	d) At least 800 bytes	
16	How many bytes A sent to B?		
	□ a) 200	□ c) 3601	
	□ <b>b</b> ) 600	□ <b>d</b> ) 8002	
17	How many bytes B sent to A?		
	□ <b>a</b> ) 400	□ c) 1000	
	□ <b>b</b> ) 800	□ <b>d</b> ) 1200	
18	What was the last value of B congestion window (cwnd)	)?	
	□ <b>a</b> ) 600	□ <b>c</b> ) 1000	
	□ <b>b</b> ) 800	d) It's not performing congestion control.
